Subject: ND Brine Spill

---

Emilio,

Rachel Maddow had segment last night that there is another pipeline spill of 3 million gallons of toxic brine. Today it was reported largest spill in North Dakota history. Blacktail creek to be drained by the pipeline company. Sounds very bad. Also said Bridger pipeline was built with faulty welding techniques according to inside climate news. Interviewed Elizabeth Douglas with inside climate news. U can probably see the whole segment on the shows website.
